Therap® Global
Person-Centered. Data-Driven.

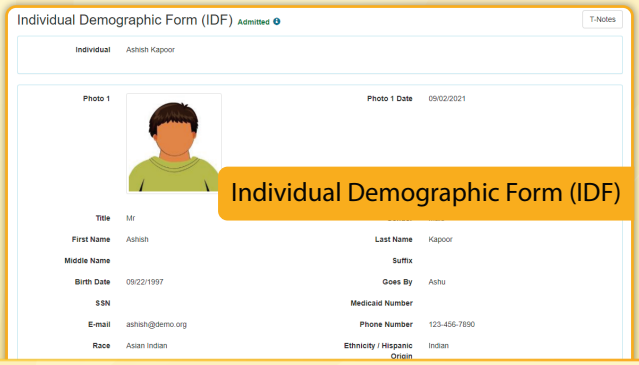
About Therap Global

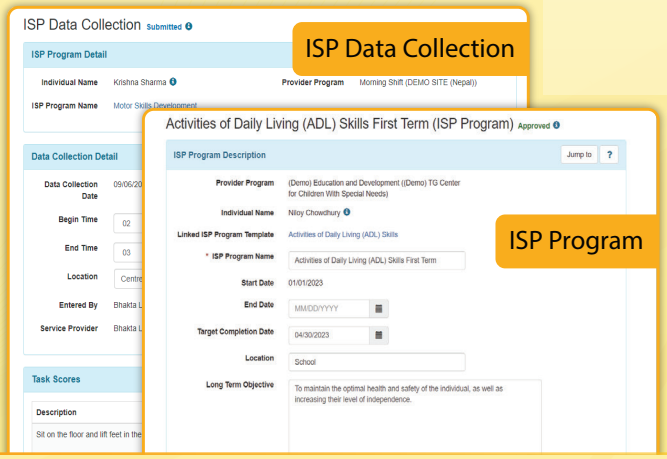
Therap Global is the industry leader in online documentation for organizations supporting Persons with Disabilities. Since 2003, Therap's suite of applications has helped to serve the daily documentation, communication and reporting needs of a wide range of organizations. Our tools allow organizations to track and document vital information from computers, smartphones and tablets. Therap Global is building a global community where service providers from different parts of the world discuss and share their best practices through the lens of digital documentation.

Therap is currently used by over 10,000 providers across the globe, including the United States, Bangladesh, Nigeria, Philippines, Kenya, Nepal, South Africa, Uganda, Tanzania and more. Therap's software suite can help improve services that are required for better livelihood including individualized support, clinical services, quality education, therapies, vocational skills development, psychiatry, counseling, training and more.

Individual Demographic Form

- Record demographic information of Persons with Disabilities
- Enter medical information including disability types using ICD-10 and DSM-5 diagnosis codes
- Document guidelines related to communication, mobility, dietary needs, and other factors



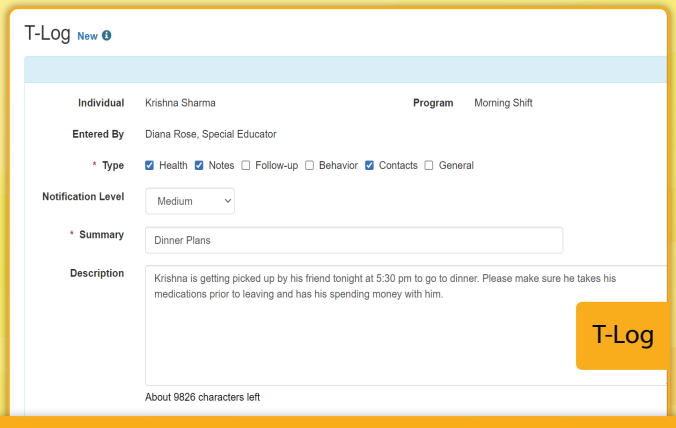


ISP Program and Data Collection

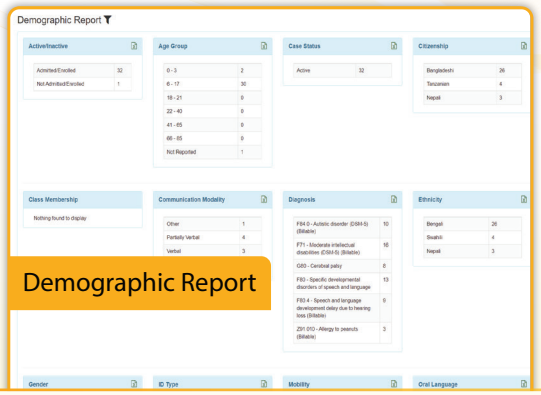
- Collect data to track progress on a regular basis, from an existing Therapy Plan, Education Plan or Person-Centered Plan
- Generate reports in multiple formats to show progress on goals
- Plan actionable steps according to the person's needs
- Analyze data over a range of time

T-Log/Progress Notes

- Document daily notes, weekly notes, nursing notes, therapy notes or communication logs efficiently in real-time
- Organize notes by categories including health, behavior, contact & general information
- Enhance communication between providers and staff



Therap Global
Person-Centered. Data-Driven.

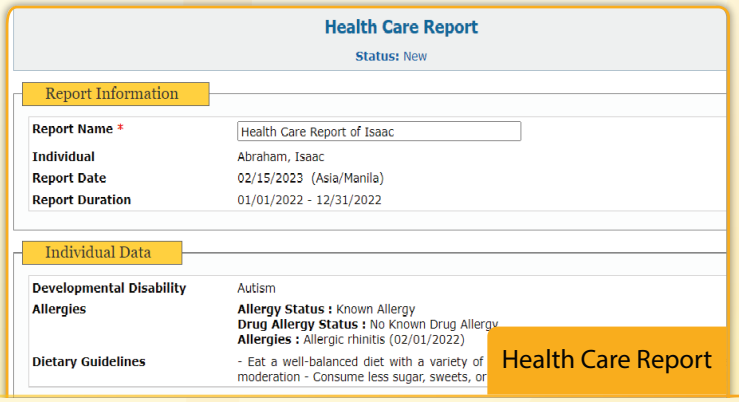


Demographic Reports

- Display relevant demographic statistics by active/inactive individuals, gender, age, mobility, communication modality, and more
- Show counts of individuals enrolled in different programs or services
- Generate detailed statistical reports which can be exported to Excel

Health Records

- Schedule and document appointments with Physicians, Specialists, Therapists, and more
- Track various tests, immunizations, infections, and more
- Keep track of blood glucose, vital signs, skin/wounds and more
- Generate detailed Health Care Reports



Medication Administration Record (MAR)

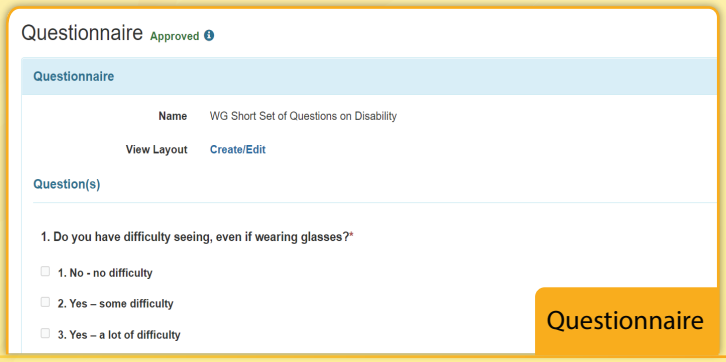
- Track scheduled medications and treatments
- Due/overdue medications
- Get monthly administration reports

Questionnaire

- Prepare customized survey and assessment questions
- Have the ability to ask specific questions with personalized answers
- Access the Questionnaire Form from Case Notes and Individual Plan module, Eligibility, Level of Care, and Priority List modules

Case Note

- Configurable templates
- Individualized service notes
- Detailed records of face to face meetings/sessions
- Ability to link to a questionnaire



Attendance

- Friendly user interface to easily and accurately enter class/program attendance data
- Able to record and update attendance data for multiple individuals for multiple services
- Multiple time in/time out entries per day
- Use attendance data to generate statistics and other reports

Individual Plan

- Support individuals to create a shared vision for a good life
- Discover, explore, & plan meaningful supports
- Identify personal goals & strategies to achieve them
- Ability to make 5 types of customizable plan templates

Therap® Global | Person-Centered. Data-Driven.

Therap Global is committed to providing the tools to achieve the UN's Sustainable Development Goals (SDG)

SDGs are built around the core principles of "inclusion for all" and "leaving no one behind". Therap Global's tools and activities help in improving the quality of care provided to people with disabilities in ways that help achieve a wide range of SDG goals including:

- Improving Health Care (SDG 3)
- Facilitating Inclusive Education for children with special needs (SDG 4)
- Promoting economic inclusion of Persons with Disabilities (SDG 8)
- Providing measures against the impacts of climate change (SDG 13)
- Improving accountability and enhancing collaboration to build partnerships (SDG 17)
