T-Log

The T-log module offers a simple way for organizations to document and share general day-to-day events, health, or behavioral concerns with team members.

- Enter and share contact notes, progress notes, daily shift notes, or communication logs efficiently
- Preset categories includes Health, Note, Behavior, General, Contacts & Follow-up
- Allows users to collect and share day-to-day information with team members involved in supporting individuals. This could include teachers, support staff, and family members as determined by each provider
- Displays counts for unread T-Logs on the Dashboard, based on the selected notification level (High/Medium/Low)

T-Log Submitted ⓘ

Individual	Amit Chowdhury	Program	Day Shift
Type	Health , Behavior		
Notification Level	Medium		
Summary	Amit was feeling cold		
Description	Amit's body temperature seemed to be higher than usual. He was behaving odd and could not give proper attention to the tasks. He also left early for home with his mother.

ISP Data & Program

ISP Data is used to collect data for the associated ISP Program.

- Collect data to track progress of individuals on a regular basis, from an existing Education Plan or Person Centered Plan
- Verify visits electronically using GPS location
- Generate reports that show percentage of progress on goals based on entered data

Programmatic Report (Bar Graph)

ISP Reports

- Therap's ISP Report feature allow users to generate various type of progress reports (Programmatic, Clinician, Data Collection Monthly) according to their needs
- Assists in tracking the progress and planning future steps according to individual's needs
- Allows analysis over a range of time using graphs and tables
- Shows task scores and progress towards goals, which can be displayed in a printable format as needed

Health Records

Therap's Health Tracking module allows users to track different types of health data and create monthly reports.

- Schedule & document appointments with Physicians, Specialists, Therapists and others
- Track various tests, immunizations, infections etc
- Keep Track of blood glucose, vital signs, medication history and more
- Generate detailed Health Care Reports
