

Improve Your Support for Persons with Disabilities with Better Documentation

An Ideal Solution For

- Individual Education Plans (IEPs)
- Person-Centered Planning
- Behavioral, Occupational, and Speech Therapy
- Health Information Tracking
- Vocational Programs
- Assessment and Early Intervention
- Audit Reports for Donor Organizations
- Accountability and Transparency

Benefits from Using Therap

- Access Information from Anywhere
- Keep Documentation Secure
- Find Records within Seconds
- Generate Comprehensive Reports Quickly
- Visualize Progress with Graphs
- Communicate Securely with Staff and Monitor their Activity
- Share Reports with Guardians and Donors

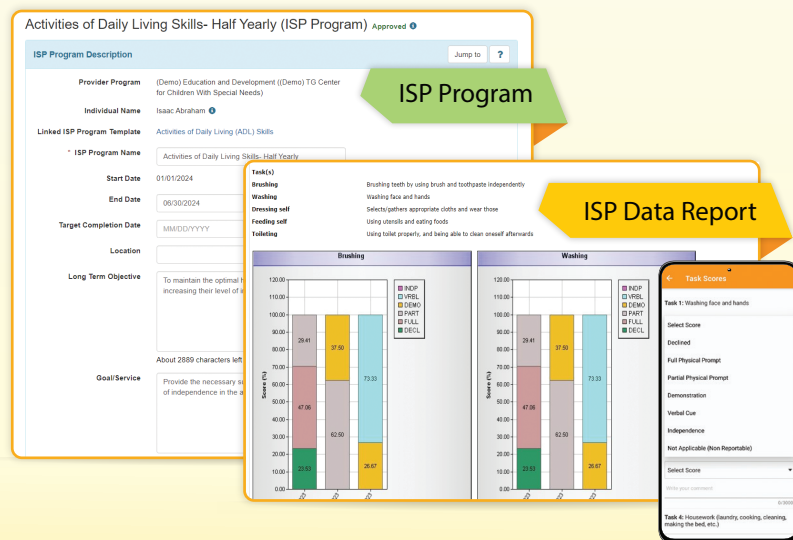

About Therap Global

Therap Global offers an online documentation software designed to facilitate the secure documentation of information, report generation, and enhance communication for organizations supporting individuals with disabilities. Therap's comprehensive suite of tools serves diverse sectors, including special education, therapeutic services, healthcare, and community-based rehabilitation.

Our tools effectively address the standardized documentation requirements of government institutions, private organizations, and families across Asia, Africa, and North America.

Individual Demographic Form (IDF)

- Record the demographic information of individuals
- Maintain admission and program enrollment information
- Enter medical information including disability types, using the ICD-10 and DSM-5 databases
- Document guidelines related to communication, mobility, dietary needs, and more

Individual Support Plan (ISP)

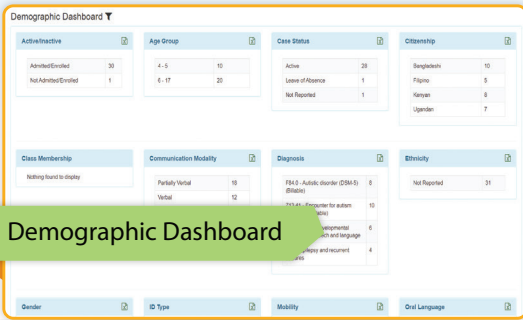

- Create Individual Education Plans (IEPs), Therapy Plans, Task Analysis, and more
- Collect ISP Data to track progress on selected goals
- Score goals and activities using computers and smartphones
- Generate and share various types of reports effectively

T-Log

- Document daily class notes, therapy progress, behavior information, etc. in real-time
- Organize notes by categories, including Health, Notes, Behavior, and more
- Attach important files, pictures, and videos
- Enhance communication between staff and guardians

Demographic Dashboard

- Display demographic statistics by active/inactive individuals, gender, age, mobility, communication modality, and more
- Generate the demographic data for specific programs or all programs
- Produce an overview report for internal and external audits

Case Note

- Create personalized care plans with configurable templates
- Access to relevant information for assessments and decision-making
- Generate reports to analyze the progress of long-term services

Case Note submitted

Template: TGD Pre-Assessment Form (Version 1.0)

Question(s)

1. Name*

2. Gender

- ☐ 1. Male
☐ 2. Female

3. Date of Birth

Questionnaire

Questionnaire

- Create customized surveys and assessment questionnaires
- Add personalized answer types with hints to get specific answers
- Access from multiple Therap tools

Event Data List

Behavior	Antecedent	Intervention
Aggression towards others	Asked to wait Engaging in uninterested activity	Allowing quiet play Explaining the rule Guided breathing
Aggression towards themselves	Asked to wait Asked to work independently Engaging in uninterested activity Working with peers Working on a task	Guided breathing Peer mentoring Relaxation program Verbal instructions
Screaming/Yelling/Shouting	Asked to wait Engaging in uninterested activity Left alone while adult is talking to someone else	Allowing quiet play Guided breathing Peer mentoring Providing a choice Verbally instructing

Behavior Plan

Behavior Plan

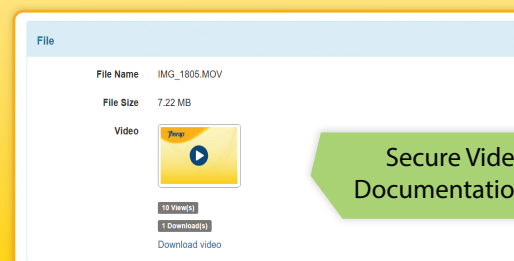

- Create behavior plans with intuitive workflow
- Implement Applied Behavior Analysis (ABA)
- Generate reports and visualize trends with graphs

Health Tracking

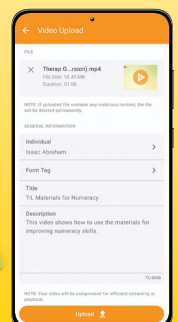

- Schedule and document appointments with Physicians, Specialists, Therapists, and more
- Input and track real-time health data, including, immunizations, infections, blood glucose, vital signs, and more
- Ensure health data privacy – HIPAA compliant
- Generate comprehensive health care reports

Secure Video Documentation

- Upload and manage videos containing PHI
- Attach video as an additional level of detail to T-Log, ISP, GER, and Individual Home Page
- Share videos securely with guardians

Secure Video Documentation

Therap Global Helps in Achieving SDGs

Therap Global is committed to providing the tools to achieve the UN's Sustainable Development Goals (SDGs). SDGs are built around the core principles of "inclusion for all" and "leaving no one behind". Our tools and activities help in improving the quality of care provided to people with disabilities in ways that help achieve a wide range of goals including:

- Improving Health Care (SDG 3)
- Facilitating Inclusive Education for children with special needs (SDG 4)
- Promoting economic inclusion of Persons with Disabilities (SDG 8)
- Providing measures against the impacts of climate change (SDG 13)
- Improving accountability and enhancing collaboration to build partnerships (SDG 17)

Therap Mobile Application

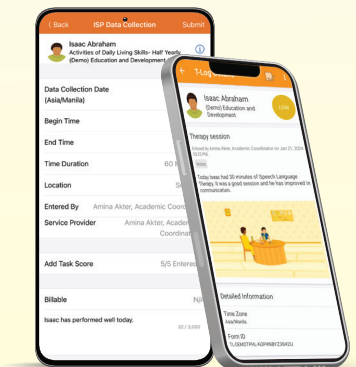

With Therap's Mobile Application, users can collect person-centered data in a community setting using their smartphones.

Mobile T-Log

- Enter and share daily notes
- Set notification level and acknowledge T-Logs
- Take pictures and add videos to attach with notes

Mobile ISP Data

- Collect service data remotely
- Track service location with GPS
- Collect signatures to verify service delivery
- Take photographs as part of documentation

User Guides

We offer user guides available in English, Bangla, Swahili, Tagalog, Arabic, Spanish, and Nepali for the convenience of our users.
