

Therap Global Newsletter

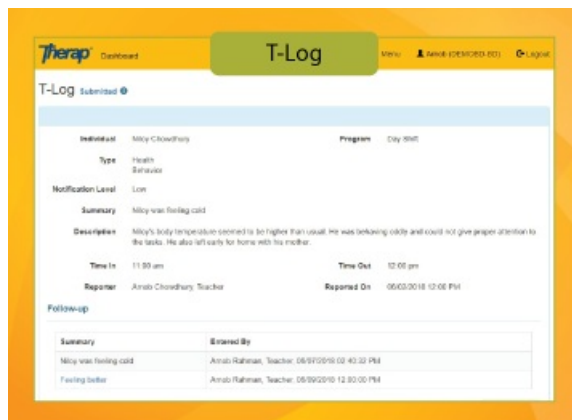

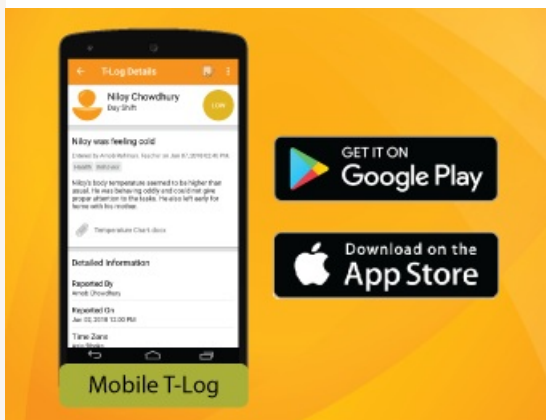

August 2018

Important Therap Global Modules:

Therap Global offers many important features which can help the organisation working with Persons with Disabilities (PWD) to make their documentation more easier and time efficient, such as:

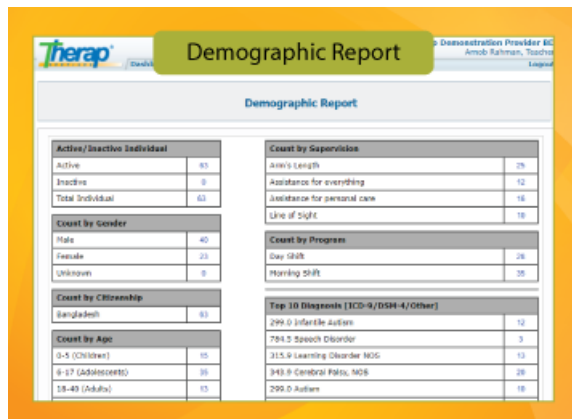

Daily Progress Note

Daily progress note known as T-Log (in Therap) is one of Therap’s most used modules. T-Log is a simple and effective way for agencies to enter and share daily shift notes, case notes, contact notes, behaviours or logs efficiently. T-Log allows to collect and communicate day-to-day information and progress notes with other staff members who can add follow ups and share in a secure way. Therap’s mobile application also allows to create and view T-Logs from mobile phones.

Demographic Report

Demographic report is a very important tool for the data analysis of an organisation. This report shows demographic statistics of the Persons with Disabilities (PWD) by active/inactive individual, gender, age, communication modality, diagnoses etc.

ISP Report

ISP report can be generated on the services provided to the Individuals to track service delivery and progress towards goals. This module offers various types of reports analyzed with graphs and tables over a range of time.

Other Therap Global Modules

- Individual's General Information
- Personal Development Plan
- Medication Administration Records
- Attendance Tracking
- Health Tracking Forms and Reports

Upcoming Live Group Session
