

Refresh User Privileges

Users with the **IDF Admin** administrative role will be able to refresh their privileges.

Note: If the **Privileges>Refresh** option is not available on the Dashboard, users can **Logout** and **Login** to refresh their privileges. Users without the required privileges may contact the provider admin of the agency to update their profiles.

When users with the sufficient roles and privileges encounter this insufficient message, their privileges have to be refreshed.

The screenshot shows the top navigation bar of the Therap Global dashboard. On the left, it says 'Therap Global Dashboard'. On the right, there is a 'Menu' icon, the user name 'Sonia (DEMOTG-TGD)', and a 'Logout' button. Below the navigation bar, a light pink message box contains the text: 'Sorry! You do not have sufficient privilege to access this page.'

1. To refresh the privileges, Click on the **Admin** tab from the Dashboard.

To Do	Care	
Individual	T-Log	New Search Archive
Admin	Case Note	New Search Bulk PDF
Agency Reports	ISP Data	New Search Report Search Report Dashboard
Individual Home Page	ISP Program	New Search Acknowledgement Report
Settings	ISP Program Template Library	New Draft Approved Search
	Global Template Library	Search ISP Program Template

2. On the Admin tab under the 'General' section, click on the **Refresh** link beside **Privileges**.

To Do	General	
Individual		
Admin	User	New List Import from Excel Search Imported Excel Assign External System ID Self Password Reset
